Business combinations and consolidation. Business combinations are returning to the agenda of the International Accounting Standards Board (the Board), with the forthcoming publication of a discussion paper on business combinations under common control and a consultation on accounting for goodwill. Our materials provide analysis on the current discussions, as well as guidance on the Board ' s consolidation suite of standards covering accounting for investments in subsidiaries, associates ...

Business combinations - KPMG Global

Accounting for asset acquisitions follows a cost accumulation model, rather than the fair value model that applies to business combinations. As entities adopt the new definition of a business, we expect more transactions to qualify as asset acquisitions. ASC 805-50 provides only limited guidance, so entities need to consider other sources, such as:

Handbook: Asset acquisitions - KPMG

For a transaction or event to be a business combination, the activities and assets over which the acquirer has obtained control is required to constitute a business. IFRS 3 requires acquisition accounting to be applied to all business combinations in its scope.

IFRS 3 - Business Combinations - KPMG

The Business combinations and noncontrolling interests guide discusses the definition of a business and transactions in the scope of accounting for business combinations under ASC 805. It also provides guidance on identifying the acquirer, determining the acquisition date, and recognizing and measuring the net assets acquired.
