Financial Programming and Policies (FPP) This course, presented by the Institute for Capacity Development, explains how to diagnose macroeconomic imbalances and correct them through a coordinated set of adjustment policies. It covers the principal features of the four main macroeconomic sectors (real, fiscal, external, and monetary) and their interlinkages, highlighting both accounting and behavioral relationships and using data from a country case study.

Financial Programming and Policies - IMF

Financial programming is a framework to analyze the current state of the economy, forecast where the economy is headed, and identify economic policies that can change the course of the economy. In Part 1 of the FPP sequence, presented by
