Step Away From The Drill: Your Dental Front Office Handbook to Accelerate Training and Elevate Customer Service

Step Away From The Drill: Your Dental Front Office ...

As soon as the step drill has been drilled through, the two or three cutting edges are already in place. The burr-free and sharp cutting edges cut the workpiece and guide the chip over the groove profile. The step angle is 90° and determines the transition from one step to the next. The transitions are used for chamfering or deburring the hole.
