Persis Love travels to Germany and the UK to explore the sector's developing technologies and business models. By 2050 it's estimated there'll be over 6.5 billion people living in urban spaces, and...

Vertical farming: a future way to feed urban populations?

An estimated 10⁹ hectares of new land (about 20% more land than is represented by the country of Brazil) will be needed to grow enough food to feed them, if traditional farming practices continue as they are practiced today. At present, throughout the world, over 80% of the land that is suitable for raising crops is in use (sources: FAO and NASA).

The Problem

No, Vertical Farms Won't Feed the World While they are well-intentioned, new indoor "farms" won't help feed the world or reduce the environmental impacts of agriculture. We would be better to focus our efforts elsewhere.

No, Vertical Farms Won't Feed the World | by Jonathan ...

When Columbia professor Dickson Despommier set out to solve America's food, water, and energy crises, he didn't just think big - he thought up. Despommier's stroke of genius, The Vertical Farm, has excited scientists, architects, and politicians around the globe. These farms, grown inside skyscrapers, would provide solutions to many of the serious problems we currently face, including: allowing
